

FOR IMMEDIATE RELEASE

## **Innovative Pipeline Projects Ltd. and Upside Engineering Ltd. Announce Partnership**

**Calgary, AB (December 19, 2017)** – Innovative Pipeline Projects Ltd. (IPP) and Upside Engineering Ltd. (Upside) are pleased to announce that they have entered into a partnership to provide pipeline engineering services to the North American energy industry. The two companies bring together extensive experience in pipeline and facility design, as well as expertise in project management. IPP will operate from Upside’s office in Calgary, Alberta to offer fully-integrated services.

Tony Griffin, President, IPP, expressed the benefits of this partnership: “Drawing on Upside’s well-established project delivery support systems and infrastructure, as well as facilities expertise, allows us to efficiently deliver long distance pipeline projects.”

“We are honoured to be partnered with the team at IPP, who are well recognized as experts in the pipeline industry” said Chris Read, President, Upside. “Our partnership will give us the ability to add another level of service to our existing clients, as well as allow us to offer our expertise to new clients.”

### **About IPP**

Calgary-based Innovative Pipeline Projects Ltd. is a pipeline engineering firm offering complete engineering, procurement and construction management (EPCM) services for pipeline projects, with a focus on long distance, cross country pipelines. IPP offers a full spectrum of services to cover every phase of pipeline projects, including conceptual studies, feasibility analysis, detailed design, and construction management. IPP’s three founding principals, Tony Griffin, Dave Julian and Rob Fletcher, draw on a long heritage of providing quality, innovation, and responsive client service for oil and gas pipeline projects in Western Canada.

### **About Upside**

Calgary-based Upside Engineering Ltd. is one of the leading engineering, procurement, and construction support companies in Western Canada, offering a full spectrum of engineering and design services. Founded in 1989, the privately-held firm has played a key role in some of Western Canada’s most significant energy sector projects.
